## CONTENTS

1. Historical Highlights and the need for Dissolution Testing.	<i>Vinod P. Shah</i>
2. Dissolution Science: Theories and Applications.	<i>Umesh Banakar</i>
3. Dissolution –Methodology and Scientific Principles.	<i>Suresh Venkataram</i>
4. Dissolution and Bioavailability: <i>In-Vitro-In-Vivo</i> Correlation (IVIVC), Bioavailability and Bioequivalence.	<i>Umesh Banakar</i>
5. <i>In Vitro-In Vivo</i> Correlation: Application and Limitations.	<i>Jean-Michel Cardot</i>
6. Comparison of Non-clinical Permeability Techniques for BCS Classification - Tools to Augment Dissolution Outcomes.	<i>Vatsala Naageshwaran and Sid Bhoopathy</i>
7. Automation of Dissolution Testing.	<i>Samir Haddouchi</i>
8. A Review of Dissolution Testing with Flow-through Cell (USP Apparatus 4).	<i>Jean-Marie Glantzmann and Jean-Louis Raton</i>
9. Compendial Requirements for Dissolution: A look at USP/ EP and JP Pharmacopoeias.	<i>Hakan Eroğlu, Erem Bilensoy and A. Atilla Hincal</i>
10. <i>In Vitro</i> Dissolution Testing of Nanoparticulate Drug Delivery Systems.	<i>Mangal S. Nagarsenker, Vivek V. Dhawan and Sanket M. Shah</i>
11. Drug Release from Semisolid Dosage Forms.	<i>Flavian Stefan Rădulescu and Dalia Simona Miron</i>
12. Comparative Analysis of Dissolution Data.	<i>Constantin Mircioiu</i>
13. Mathematical Treatment of Dissolution Data for Extraction of Vital Product Information.	<i>Mukesh C. Gohel, Sandip B. Tiwari and Jayvadan K. Patel</i>
14. Dissolution Testing of Generic Products: Regulatory Perspective.	<i>Raghunandan H.V., Harsha. J. and Mahesh B. K.</i>
15. Investigation of Out of Specification (OOS) Results Obtained in Dissolution Testing.	<i>Vijay U. Kshirsagar</i>
